

# DOCUMENTATION

## Amazon-Like Webpage

This project is a static HTML and CSS representation of an Amazon-like e-commerce website. It features a responsive design with a navigation bar, a hero section, product categories, and a footer. The project includes the use of Font Awesome for icons and a simple CSS structure for styling.

## Technologies Used

- HTML5
- CSS3
- Font Awesome (for icons)

## Setup

To run this project locally, follow these steps:

1. **Clone the repository:**

Copy code:

```
git clone https://github.com/vaibhavpal02/amazon-like-webpage.git
```

2. **Navigate to the project directory:**

Copy code:

cd amazon-like-webpage

### 3. Open index.html in your preferred web browser:

Copy code:

open index.html

## Features

### Header

- **Navigation Bar:**
  - Amazon logo
  - Delivery location
  - Search box with a dropdown
  - Sign-in and account options
  - Orders and cart icons

### Hero Section

- A large banner image with a message prompting users to switch to the Amazon India site if they are in India.

### Product Categories

- Several product categories (e.g., Clothes, Health & Personal Care, Furniture) displayed in a grid layout with images and "See more" links.

### Footer

- Back to top link
- Informational links about the company (e.g., Careers, Blog, About Amazon)
- Footer logo
- Legal and privacy links
